

MRI PREGNANCY QUESTIONNAIRE

Any female, ages thirteen to sixty, is required to read and sign this document before having an MRI.

1. Is there any chance that you could be pregnant?
2. If yes, how far along are you?

Although there have been no known side effects from MRI, we ask that our patients refrain from having an MRI during their first trimester, if at all possible. If the MRI must be done, we ask that you consult your obstetrician and/or physician prior to the MRI.
